January 27, 2017

Dear Parent/Guardian of Juniors:

This is a reminder that if your child would like to take the SAT or the ACT test, the dates are fast approaching. I recommend that all students planning on attending a 4-year college or university take one of these two tests. The SAT and/or the ACT test is required for entrance into 4-year colleges and universities. If your student is planning on attending a 2-year school, I still recommend taking one of these tests; as many scholarship applications also require a SAT or an ACT test score.

If your junior child is interested in taking one of the above tests, I recommend registering for one of the spring dates soon. By taking the SAT and/or the ACT this spring, it allows a student to begin preparing for admission into colleges, as well as still leaving time to retest early next fall if they so choose. I have attached registration information, along with explanations of the differences between the two tests.

In addition to registering for one of these tests, it would be beneficial for students to also prepare and study for the test. Most students have taken the PSAT sometime during their high school career. Attached to the PSAT results was an Online Access Code. Students can use this code to access SAT practice tests and other preparation tools including KHAN Academy. Your student has been working on KHAN Academy here at school to help prepare for the SAT.

Additional information about the SAT and the ACT are available in the counselor's office. If you have any questions about any of these tests, please feel free to contact me.

Thank you,

Deanna Kile
